# About Round Lab

**Round Lab** is a Korean skincare brand founded in 2017 and known for **gentle, skin-friendly products** made from natural ingredients sourced from distinctive regions of Korea.

With “honors natural beauty” and “pursues a living green” philosophy, Round Lab presents itself as **a nature-inspired, gentle skincare brand, highlighting safe, mild formulas suitable for all skin types**, especially sensitive skin.

Thanks to hero product lines like **1025 Dokdo and Birch Juice**, brand credibility is reinforced by major awards such as Hwahae Beauty Awards and Olive Young Awards.

# Round Lab's **Competitor Analysis**

|                               | Round Lab                                                                                    | Dear, Klairs                                                                                                           | Torriden                                                                                              |

# Hashtag Growth over time

**Round Lab's** hashtag has the **lowest content volume and view baseline**, though can generate quite **substantial views with minimal video output**.

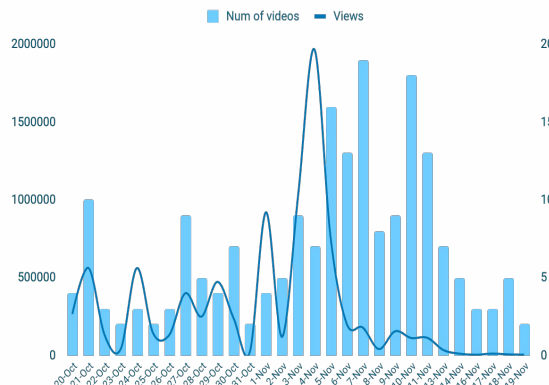

## #roundlabvietnam

last 30 days (20/10/2025 - 19/11/2025)

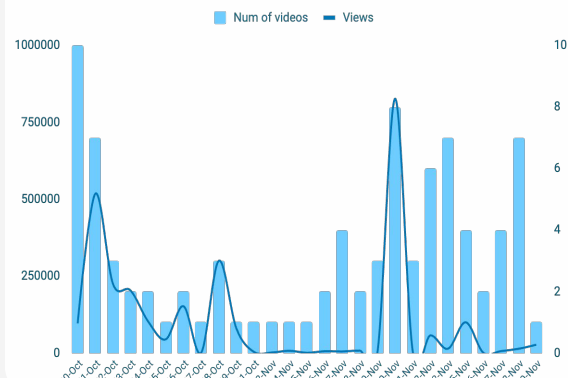

## #klairsvietnam

last 30 days (20/10/2025 - 19/11/2025)

## #torridenvn

last 30 days (20/10/2025 - 19/11/2025)

**Klairs** leads in views and brand awareness thanks to a **high volume of content creation and large network of creators** (viral videos may peak in views), however the **inconsistency and strong view fluctuation** suggest potential content saturation.

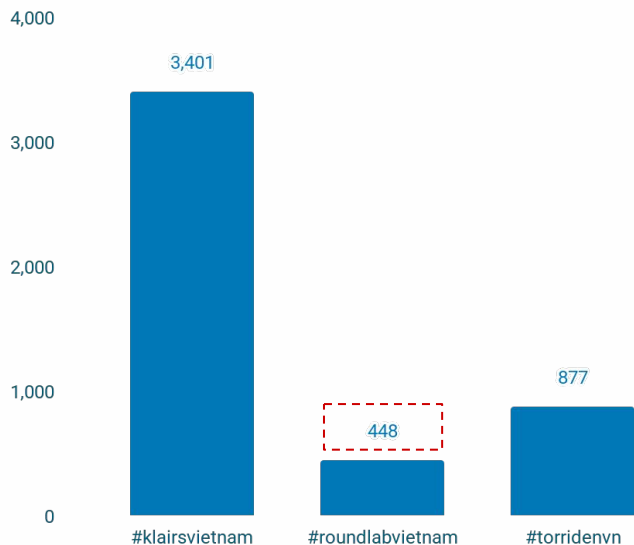

**Torriden's** hashtag trend mirrors Round Lab's, with **increases only upon new videos**. Despite its inconsistency pattern, the **recent rise in daily brand-mentioning videos** suggests growth in Torriden's creator base.

# Hashtag Performance

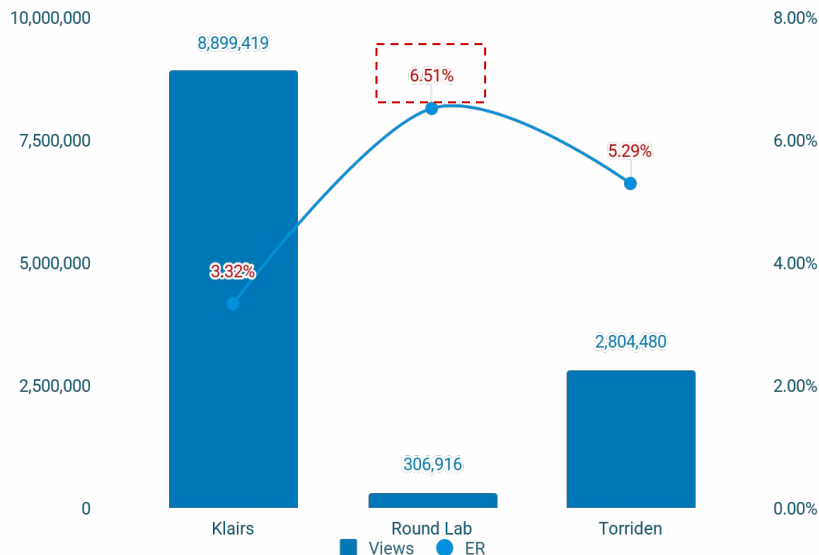

**Round Lab's low awareness and brand mentions** in Vietnam is understandable: **new market entrant** compared to established K-beauty brands like Torriden and Klairs.

Despite the significantly fewer hashtag videos in the last 30 days (8x fewer than Torriden's and 20x fewer than Klairs's), **Round Lab still achieved the highest ER** → **quality-over-quantity approach with high-performance content** can appeal to VNese audience

Hashtag volume

Hashtag performance (last 30 days)

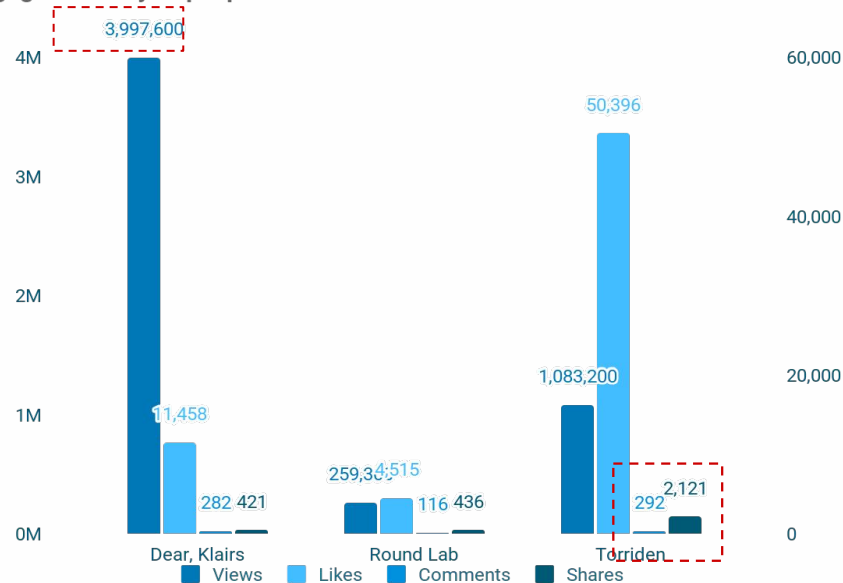

# Top 5 Most Viewed Videos

**Klairs** has massive reach (~4M) with moderate interaction  
→ **strong brand awareness and high-promoted content** (for their latest eco-green campaign “Level up Trái Đất” and new product launching: )

**Round Lab** has significantly lower absolute numbers but the comment-to-view ratio appears healthier than Klairs & Torriden  
→ **likely niche but strong relevant content**, with high shareability

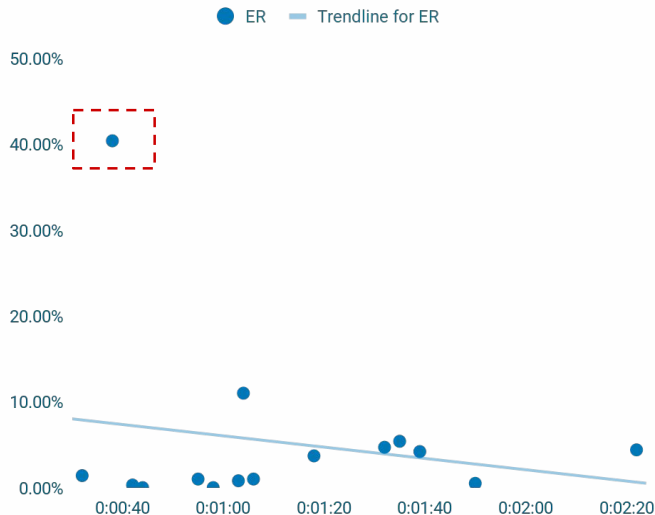

**Torriden** notably has the highest likes, comment count (292) and shares (2,121)  
→ **better in sparking conversation, good content resonance** with audience

Engagements by Top 5 posts

# Top 5 Most Viewed Videos

Correlation between Duration & ER

**Most high-performing posts are under 1m30s**, clear negative trendline: as duration increases, ER decreases

→ **TikTok audiences prefer quick, get-to-the-point content** due to short attention span  
→ though, longer format exceptions can still deliver value and balance engagement (e.g 2:20 with ~4% ER)

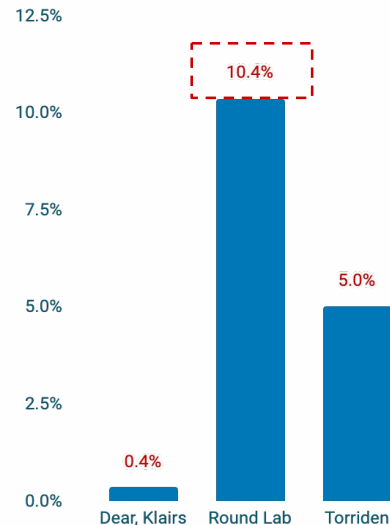

Despite high volume of views, **Klairs's lowest ER** indicates **passive content consumption** rather than active conversation, possible **reliance on paid promotion**

**Round Lab has an impressive ER (10.4%)**, maybe due to an exceptionally high-ER video (~40%)

**Torriden** has good ER, and **high comment + high share combination suggests high-effective creators' content** that prompt action over discussion

*TikTok's benchmark: average of 4.90% engagement rate (via SocialInsider)*

Avg. ER by Top 5 posts

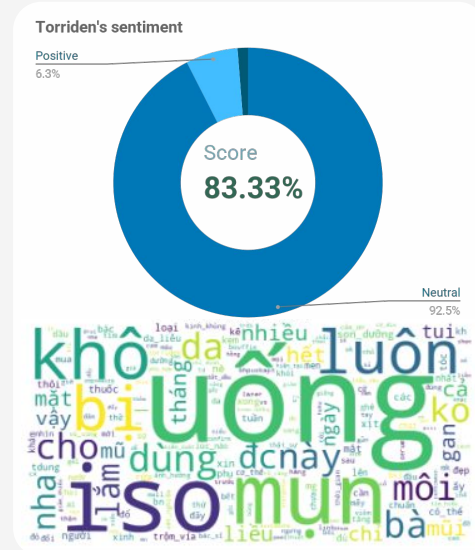

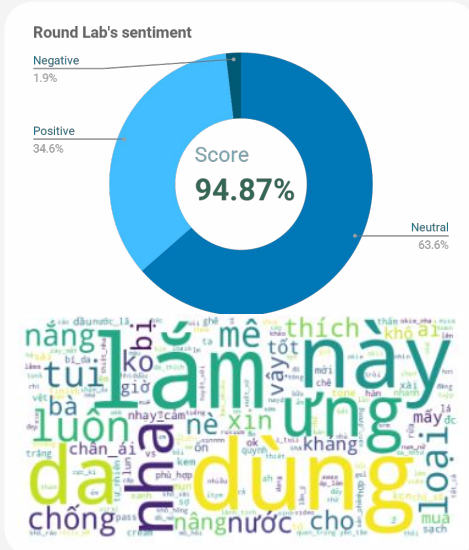

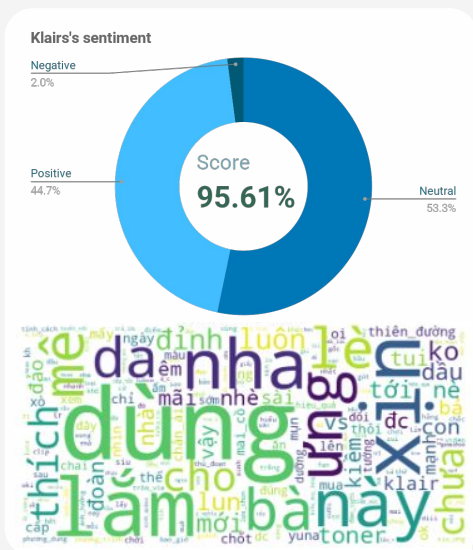

# Comment Sentiment Analysis

Overall, audience sentiment is clean and positive across all 3 brands, with very little negative responses.

**Klairs:** strongest brand clarity and loyalty, conversation centers on gentleness and sensitive-skin benefits (“làm sạch”, “toner quốc dân”, “êm”, “kiềm dầu”) → **well-defined positioning and highly loyal audience base**

**Round Lab:** 2nd highest positive ratio reflecting **strong user satisfaction** (“ưng”, “mê”, “thích”). Discussion mostly about functional effects and consideration phase (“chống nắng”, “nâng”, “kháng”, “hợp”) → **audiences highly care about proven product efficacy**

**Torriden:** very high neutral rate & low positive sentiment suggest that **discussions are more about general creator content or other products than Torriden itself**, leading to weaker emotional engagement and brand love effect

# Top performance **Content Analysis**

## Dear, Klairs

Relies heavily on promoted content. **Utilize strong brand positioning and a broad influencer mix** (macro & micro KOL/KOC) to maximize reach for new product /campaign launching

**Style:** casual, prefer short videos

**Content:** **diverse content angles:** from skincare tips to store experiences, multi-product reviews or in-depth review with key ingredient /tech highlights.

## Round Lab

**Organic content that fosters natural conversations.**

Primarily uses micro KOCs.

**Style:** get-to-the-point, mix of short and long-form videos

**Content:** informative, focuses on **single-product deep reviews with functional benefits** and suitability for various skin types. This builds user trust but may limit reach and emotional engagement.

## Torriden

Collaborates with **creators known for Korean-themed content** (K-lifestyle, K-food). Affiliate creators invest heavily and **link products directly in TikTok shop.**

**Style:** lifestyle, long-form content (>1min)

**Content:** **broad approaches: product integration in daily / lifestyle content**, multi-product reviews, before-after effects or Olive Young choice claims. However, some may dilute audience attention.

# Key Learnings & Recommendations

## Diverse content angles while keeping brand core to build emotional & lifestyle resonance

Keep straight-to-the-point review style, **short and high-impact content** and **discover more approaches**: multi-product brand ecosystem reviews, creators' lifestyle/routines integration without losing functional focus, question-led content that sparks discussion. Reinforce trust by **highlighting brand credentials** (Top 1 Olive Young, eco-friendly ingredients, gentle formulations)

## Expand KOC/creators base or leverage influencer strategy to boost brand awareness

Micro KOC content can generate high ER, informative but relatively low-key and low visibility. **Diversify influencer tiers** who can clearly **communicate Round Lab's nature-inspired, gentle skincare brand positioning** and differentiate brand competitive advantages (nature-based, Deep-sea water from Dokdo island, affordable price...)

## Leverage high positive sentiment by UGC

High positive sentiment rate suggests **good perception of Round Lab's identity and users are ready to advocate**. Brand can trigger active engagement and maximize virality potential through **UGC challenges or reshare customer's UGC** on main page. Also **consider TikTok Shop product featuring** that drive measurable conversion
